

SEBASTIAN SORIA

FULLSTACK DEVELOPER

Experience

Software developer

Cencosud

2022 – 2024

I worked as a React Native developer at Cencosud. One of my main tasks was creating and maintaining a component library that we published on npm. For this, we used modern technologies such as React Native, Expo, StoryBook, CSS Modules, and TypeScript. In the last six months, I served as a front-end developer, integrating micro-frontends for the regional back offices in Peru, Chile, Colombia, Argentina, and Brazil. During this period, I worked with React, GraphQL, and Styled Components, which allowed me to improve my skills and contribute to the success of our projects.

Hello! I am Sebastián, a developer with three years of experience, focused mainly on frontend but with knowledge in backend. Previously, I practiced boxing and martial arts, which taught me discipline and teamwork. Now I apply those skills in my daily work with the team I work for.

Skills

JavaScript (ES6+) + Typescript.
React + React Native+ Zustand + Next
Node + Express + NestJS
MySQL MongoDB
Spring Boot
Git
